NOTHER Exhibition of Hongkong products opens tomorrow. In less than two acres of land in Kowloon a Colony produces goes on view to the public and to overseas traders. This is an important exhibition but why, year after year, do so many displays have to be squashed into such a confined space. Why do the size of displays have to be limited. Is there not a bigger exhibition ground available?

But Mendes-France went on with a host of others of the "old gang", and today the General must be seriously assessing his chances of pushing through his liberal plans for reform in Algeria against a possible solid opposition of 133 Conservative Deputies.

For behind the Conservatives and 70 deputies from Algeria is the Army, xecolute in its determination to make no concessions to nationalists. The pledge that the Army has tucitly given that, it will keep out of politica has so far been kept; but there are fears that the Algerian problem will provoke a collision.
